

# ShadowTrak

## Passive Phone Locator

ShadowTrak presents a standalone passive homing, from 1 km down to 1 meter, locating any phone from any technology, including 5G NSA/SA.

### Operational Use Cases

- Accurate Location
- Presence in a Location Area
- Hybrid Active & Passive
- Passive Identification

### Highlights

- **Requires only phone number (MSISDN)**  
Phone number may be easier to come up with, rather than IMSI.
- **Long distance operation**  
Accurately Locate a phone within a 1-Kilometer range  
Determine phone presence in **Location** area (LAC/TAC - Few square kilometers)
- **5G NSA/SA**  
Due to its nature, it doesn't break encryption, and can be used in any technology
- **Undetectable passive operation & RF safe**  
No interference to the target or network.  
Safe for the user and for other equipment.
- **Covert operation, simple to use & deploy**  
Single click operation  
Simple vehicle deployment using internal small antennas and a 12v plug
- **Multiple form factors**  
Can be used indoors, as a handbag or outdoors, in a vehicle.
- **Work in high-power cells environment**  
Powerful cells improve reception distances.
- **Active-Passive hybrid operation**  
Start from afar with the ShadowTrak then handover to a compact active device
- **24/7 operation**
