B-Scope

Multi-Dimensional Data Enrichment & Analysis Engine

Entity Intelligence Scope for Investigations and Operations

BouraCyber Solutions delivers a strategic, multi-dimensional data enrichment and analysis engine for intelligence organizations. It enables deep understanding of investigated entities, identification of future targets, and personalized strategic or tactical engagement.

By aggregating public and private data sources and processing millions of data points, the platform generates actionable intelligence with a low digital signature.
Going beyond standard enrichment, the system dynamically weights and scores data sources in real time, intelligently selecting the most relevant source for each entity to reduce noise and maximize accuracy.

Product highlights:

End-to-end Data Enrichment solution - collection, analysis & reporting

Cost effective – rapid results without relying on highly skilled analysts

Vast amount of information across the surface and deep web Advanced Data Intelligence Capabilities

Stealth & Secured - complete and comprehensive network source anonymization & encryption
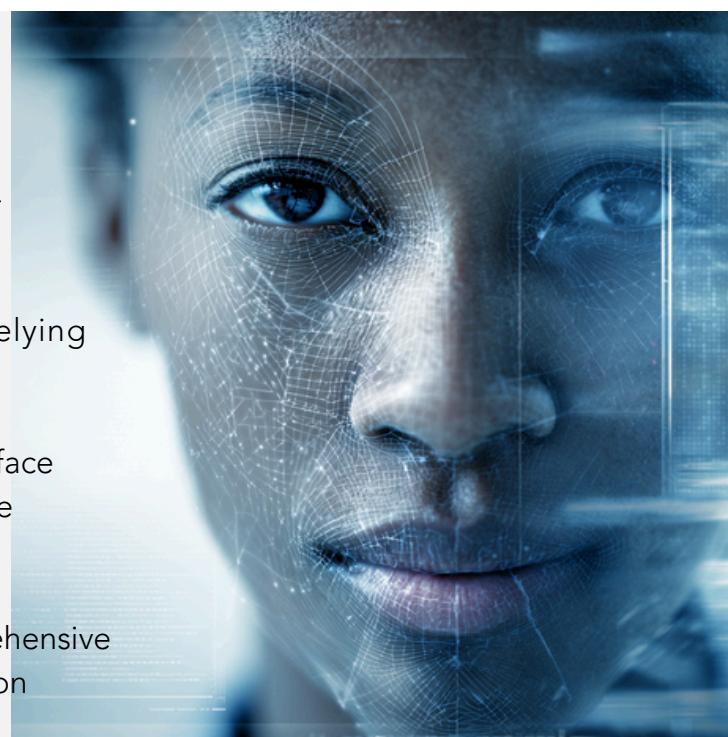

Data sources

Online API Services - 100+ online sources which support the profile match process.

Social Networks / Internet Sources - scans and collects content from the leading social networks as well as additional internet sources e.g. Facebook, Twitter, Google and **more.**

Deep and Dark Web Sources - unique access to 80B+ records e.g. leaked information.

Customer provided databases (optional).
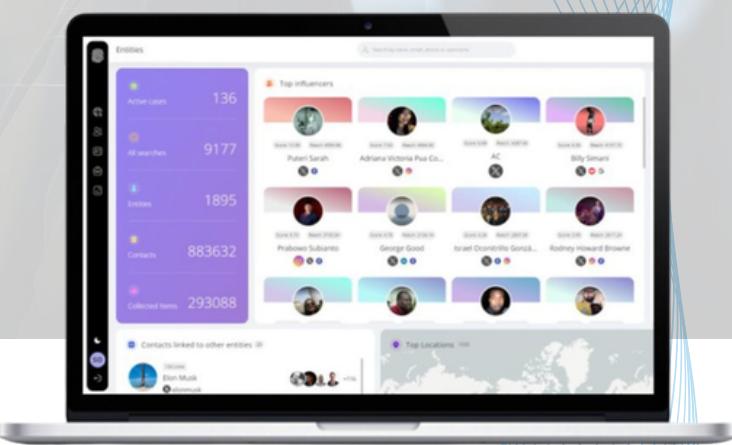

A Multi-Dimensional Data Enrichment

a modular solution, allowing intelligence organizations to deploy the relevant modules and engines in accordance to their specific requirements.

EXPLORE

widely searches for information when only partial, non-unique data is available

ENRICH

easily profiles entities of interest by using a single lead for the investigation

ENGAGE

Advanced end-to-end environment for managing and controlling multiple virtual identities online

LENZ

an AI based module which brings up relevant information regarding faces, objects and text

Data Intelligence Capabilities

- Cross-platform analysis and insight engines

- Generate actionable intelligence on behavioral patterns, target

- clustering, link, text, media analysis, and online presence

- Connect investigated entities to enable instant, informed decision-making at a glance
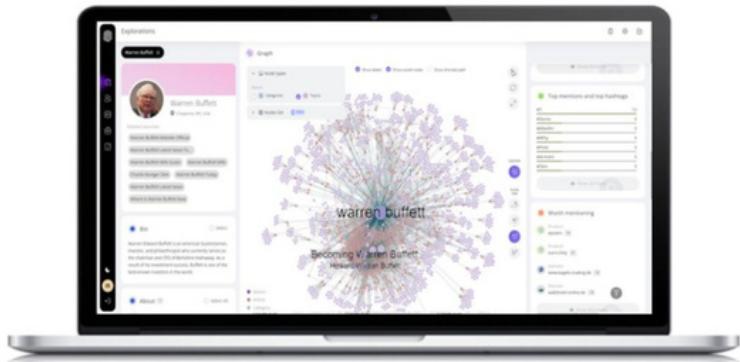

Why *B-Scope?*

B-Scope empowers intelligence organizations to extract meaningful, actionable insights from vast and complex data environments.
By combining multi-dimensional data enrichment with dynamic source weighting and real-time analysis, it eliminates noise and reveals what truly matters.
Modular, secure, and low-signature by design, B-Scope enables faster, smarter decisions in the fight against terrorism and crime
