

BOURA CYBER
Intelligence Security Solutions

Your Trusted Partner in the Complex World of Security Intelligence

**Cutting-edge intelligence solutions
and best-of-breed security services
to enhance your digital landscape
and operations.**

Our Solution

Counter Drone System

A comprehensive, multi-layered defense system to detect, intercept, and neutralize unauthorized drone activity in real-time.

Passive Phone Locator

Passive operation, targets MSISDN, 2G, 3G, 4G & 5G NSA/SA, for indoor and outdoor covert operations. Accurate location from 1 km to 1 meter.

OSINT Investigations

An AI-powered open-source intelligence (OSINT) platform designed to detect, analyze, and track threats, disinformation campaigns, and coordinated influence operations.

Cyber SOC Solutions

A next-generation security operations center, leveraging a holistic approach to prevention, detection and mitigation.

Our Customers

- Law Enforcement & HLS Agencies (HLS & LEA)
- National Security Agencies (NS)
- National Intelligence Agencies (NI)
- Ministry of Defense (MOD)
- Ministry of Justice (MOJ)
- Critical Infrastructures

Why BouraCyber Solutions?

Our full-service formula combines **robust certified solutions** provided by a **dedicated professional team**.

Our trusted customer base benefits:

- ✓ Vast Experience in the field
- ✓ Large Install base
- ✓ Best-Of-Breed technology

BouraSOC

A holistic approach to the prevention, detection, and mitigation of any cyber threat.

- End-to-end SOC: from design to incident response
- Customizable detection, triage, and forensic workflows
- Integrated IT, OT, IoT, and cloud monitoring
- Intelligence-enriched alerts and guided threat hunting
- Advanced forensics and playbook-driven response
- Scalable for enterprise, government, and critical infra

BouraSOC adapts to your threat landscape, delivering visibility, speed, and control under one unified cyber shield.

BouraOSINT

From Online Signals to Strategic Intelligence

- Real-time monitoring of X, TikTok, Telegram & more
- Detects threats, disinformation and actor networks
- Cross-language narrative and sentiment analysis
- Identifies bots, trolls, and AI-generated content
- Visual link analysis maps key influencers and connections
- Tracks evolving events from post to protest

BouraOSINT offers end-to-end visibility, transforming digital chaos into decisive action before threats hit the ground.

Counter-Drone System (CDS)

Full-Spectrum UAV Defense - No Threat Left Unchecked

- End-to-end solution: detect, identify, track and neutralize
- Multi-sensor fusion: RF, radar, EO/IR, protocol analytics
- AI classifies drone type, vendor, intent and operator location
- Smart neutralization: redirection, disconnect, safe landing
- Passive operation ensures no collateral disruption
- Fixed, mobile, or portable deployment with unified C2

Wherever, drones emerge, BouraCyber's CDS ensures they're identified, intercepted, and eliminated with surgical precision.

ShadowTrak

A Passive Phone Locator

- Detects and locates by MSISDN
- Supports 2G, 3G, 4G & true 5G SA networks
- Over 1 km down to 1 meter
- Works in high-power cell environments
- Covert deployment - no external antennas
- Vehicle and portable options: 7kg or 3kg units
- Verifies device ON/OFF status and geo-area
- Undetectable by standard counter-surveillance tools

Stay covert, stay accurate - ShadowTrak outperforms legacy IMSI catchers in range, stealth, and network support.

About BouraCyber

BouraCyber Solutions, founded by cyber intelligence experts with 30+ BouraCyber Solutions was founded by cyber intelligence experts with more than 30 years of domain experience. Dedicated to our customer needs, we focus on field-proven, best-of-breed, innovative products, top-notch execution, and customer service.

Through our theme-driven focus and strong network of strategic partners, we seek and develop innovative technologies to stay ahead of the latest market trends while addressing today's ever-changing needs.
