

B-ShadowTrak

Precise, Passive Tactical Phone Locator

Empowering Law Enforcement with a Passive Phone Locator

BOURACYBER introduces ShadowTrak - The Passive Phone Locator, a discreet, compact device that leverages AI and Machine learning technology to silently and effectively track and pinpoint cell phones within a 2-kilometer radius.

ShadowTrak utilizes AI algorithms to identify and track the changing token by passively analyzing the communication within the existing cellular network activity. It simply requires inputting the target's phone number and being in his vicinity. It works on all phones, networks, and technologies, including 5G SA!

Product highlights

- Requires only phone number (MSISDN)
- Long-distance operation
- 5G NSA/SA
- Undetectable Passive Operation & RF Safe
- Covert operation, Simple to use & deploy - Single click operation
- Multiple form factors
- Work in a high-power cell environment
- Hybrid Operation
- 24/7 operation
