

B-Social

Open-Source Intelligence for Social Threat Detection

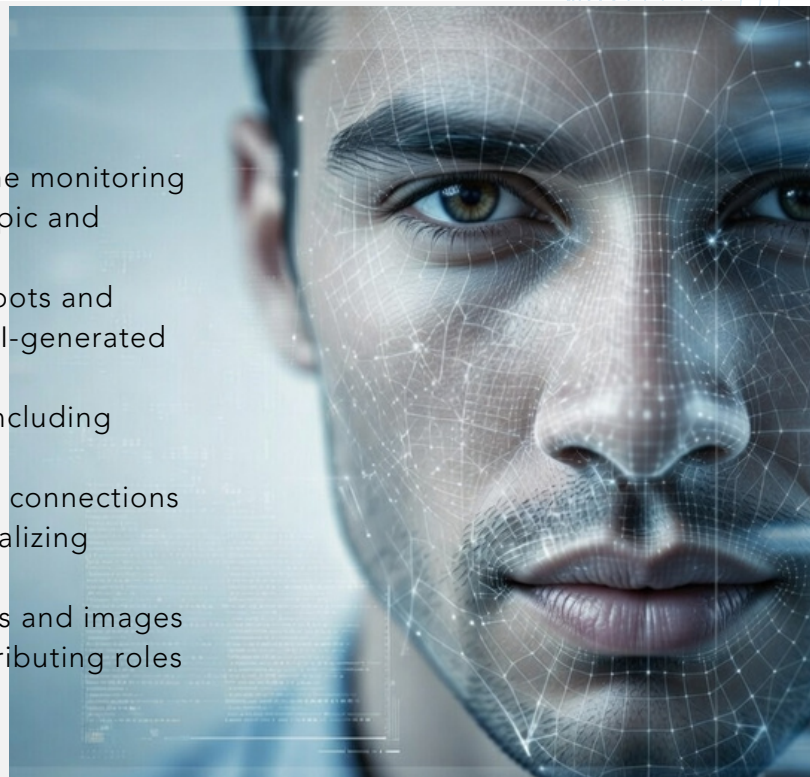

From Posts to Protests: Turning Online Noise into Actionable Intelligence

B-Social is an AI-powered open-source intelligence (OSINT) platform designed to detect, analyze, and track emerging threats, disinformation campaigns, and coordinated influence operations across the social web.

From individual actors to mass mobilizations, *B-Social* enables security agencies, intelligence analysts, and government entities to uncover malicious behavior in real-time - before online conversations escalate into physical action.

Product highlights

- **Multi-Platform Monitoring** - Real-time monitoring across major social platforms, 24/7 topic and sentiment tracking.
- **Threat Actor Detection** - Detecting bots and coordinated campaigns, identifying AI-generated content
- **Cross-language narrative analysis**, including hashtags and emerging trends.
- **Visual Link Analysis (VLA)** - Mapping connections between actors and content, and visualizing influence networks.
- **Media-Based Actor Tracking** - Videos and images analysis for suspect identification, attributing roles using metadata insights.

BouraCyber Solutions, founded by cyber intelligence experts with 30+ years of domain experience, offers comprehensive security services. We prioritize field-proven, best-of-breed innovative products, top-notch execution, and customer service.
